Software Engineering Lead

Summary

Software Engineering Lead with a love for product, leadership, entrepreneurship, learning and helping people grow

Work experience

2025-01 - 2025-05	Frontend Team Lead <i>Littlebird.ai</i> Built the meeting transcriptions feature in LB from start to finish for the Mac. Managed a team of 6 FE engineers, helping establish better coding and project management practices. Tech: Typescript, React, Swift, Python and Rust
2024-06 - PRESENT	Founder <i>AudiowaveAI.com</i> Built a tool to convert a book I bought into a high-quality audiobook. Posted about it online and it went viral. Managed to go viral 3 times with the product in 6 months and generate a modest \$3000 from >100 customers.
2024-01 - 2024-05	Founder <i>Nano 3 Labs (Vancouver)</i> Systematically started building 1 startup each week to find my next product. After 16 weeks and 12 project, I made my first dollar on stripe with AudiowaveAI.
2022-12 - 2023-12	Co-Founder & CEO <i>CreateiveFlow.ai (acquired)</i> Built one of top 50 plugins on Figma, within the first 12-months we went to 100K users and \$10K/MRR (thanks stripe). Our plugin lets users export animations out of figma. We did so by reverse engineering animations in figma and building our own. Responsibilities: fund-raising, marketing, built the initial MVP and video rendering flows as well.
2021-01 - 2022-12	Founder <i>Nano 3 Labs (Vancouver)</i> 50% Client work, 50% Building our own products. Products: Figma CSS Gradient Plugin, Conceptual, Emojination.io, Picturethat.io -- design tools built for different types of users. React / ReactNative, Typescript, Next.js (node.js), Prisma, Postgres, WebAssembly
2021-04 - 2022-02	Product Owner (Contract) <i>Skylab Technologies Inc (Vancouver) acquired by ImageQuix</i> Built the initial consumer app for AI Photo Retouching called Mems (formerly 1Touch) for iOS & Android. Conducted user interviews and did the initial marketing for the app. Explored the Freelancer market for a separate app and Lightroom plugin. React Native, Typescript, Node.js, AWS Serverless, Ruby on Rails
2019-03 - 2020-12	Sr. Software Engineer

Ollie Order (Vancouver) acquired by NextGlass

Ollie is a startup aiming to modernize alcohol sales in B2B space.

Led the early team of 5 engineers to deliver a working MVP in 3 months.

Worked directly on building an integrations architecture, data importers for 100K+ (products, companies, etc), payments implementation, search, analytics, continuous integration, automated testing with Cypress.io and more.

Other responsibilities included recruiting + training devs, helping with research tasks and organizing the team.

React, Typescript, Ruby on Rails, GraphQL, Elastic Search, Postgres

2016-07 - 2019-03

Founder

Nano 3 Labs (Vancouver)

Started a software development agency to deliver high-quality and fine-crafted products to medium-sized businesses. Grew to 4 full-time developers.

We mainly worked on web-based projects in React and Ruby on Rails. Other projects included Augmented Reality, Unity, Swift, and UX and business analysis.

Clients included: Artona, VisualCV (used to make this resume), FI.Span, and Klue. See [portfolio for more](#).

2015-07 - 2016-04

Sr. Software Developer (Toronto)

Functional Imperative

Introduced React into the dev agency. Coordinated with an off-shore backend team with expertise in VB.net.

In addition, I wrote a secure execution environment for arbitrary ruby code provided by users to evaluate eligibility for grants on a large enterprise application.

Responsibilities: client communication, project management, estimation and prioritization of tasks.

React, Ruby on Rails, Node.js

2014-06 - 2015-06

Software Developer

Gastown Labs Web/Mobile (Vancouver)

Helped our clients with a large E-Commerce application -- Artona, updating it to the latest version of Ruby on Rails and React. js. Provided consulting on metrics tracking and technology related to business processes.

Worked on the CFL pickem (Fantasy football) app in React. js. Provided clients with code reviews, estimates, business advice and UI/UX help.

React, Ruby on Rails

2012-06 - 2014-06

Freelancer - Full-stack Web Developer (Vancouver)

Worked on many projects to get exposure to different technologies like PHP, Node.js, Meteor and Ruby on Rails, jQuery, Backbone.js, Knockout.js, Angular.js and landed on React and Rails.

2011-05 - 2011-12

Web Developer - (Co-op)

iQmetrix (Winnipeg)

Worked on intraiQ an Internet product written in .Net and Javascript. Mentored co-op students in different aspects of web development.

2010-09 - 2010-12

Software Developer - R&D Team (Co-op)

Blackberry (Ottawa)

Worked on implementing the Java Virtual Machine (JVM) on QNX, specifically the Playbook tablet and future Blackberry smartphones. Most of the work was done using C/C++ and a little bit of Java. Implemented the tones generator and multi-media APIs as well as introducing automated testing to the team.

2010-01 - 2010-04

Software Developer (Co-op)

Ceridian Canada Ltd (Winnipeg)

Worked on a web-based payroll management application known as PowerPay Web. The application was written in Java, IBM DB2, J2EE and our WebSphere web server.

Education

2008 - 2012

B.Sc Computer Science Honours (Co-op)

University of Manitoba
