Experience

AudiowaveAI

Founder

May 2024 - Present (1 year 4 months)

San Francisco Bay Area

Convert any text to audiobook-quality sound .

Built it for myself to listen to a book I bought as audio using newest AI text-to-speech models. I was blown away by the quality, posted about it online and it went viral.

Later released it for others.

Grew it to 3000 users and >\$3K revenue. Working on V2 now.

Littlebird

Frontend Team Lead

January 2025 - May 2025 (5 months)

San Francisco Bay Area

Led the frontend team and built a meeting transcription and notes feature.

Littlebird is a personal ai assistant that acts as a second brain with deep integration into the OS.

MacOS App - Tauri, React, Typescript, Rust, Swift and Python Django backend. Worked full-stack.

CreativeFlow.ai

CEO & Co-Founder

December 2022 - December 2023 (1 year 1 month)

Vancouver, British Columbia, Canada

Helped grow the product from \$0/MRR to \$10K/MRR in 12 months and +100,000 downloads.

After initial market research, we launched the most requested feature on Figma, the ability to Export GIFs and Videos, and it went viral.

Nano 3 Labs

CEO & Founder

February 2022 - December 2022 (11 months)

Vancouver, British Columbia, Canada

50% Client work, 50% building our own products.

Products: Figma CSS Gradient Plugin, Conceptual, Emojination.io, Picturethat.io -- design tools built for different types of users.

Client Projects: Realvault - Design editor for real estate agents. Mems App - consumer app for automated portrait retouching by Skylab Tech (acquired).

Skylab Technologies Inc.

Product Owner

April 2021 - February 2022 (11 months)

Vancouver, British Columbia, Canada

Built the initial consumer app for AI Photo Retouching called Mems (formerly 1Touch) for iOS & Android.

Conducted user interviews and did the initial marketing for the app.

Explored the Freelancer market for a separate app and Lightroom plugin.

UserTesting

Senior Software Engineer

January 2021 - April 2021 (4 months)

Ollie Order

Sr. Software Engineer

March 2019 - December 2020 (1 year 10 months)

Vancouver, Canada Area

Led the early dev team to deliver an MVP. Established a solid development process to help ensure our customers can depend on our software 24/7 (they used our platform to process orders each day all day).

Helped modernize liquor sales with toys like React, GraphQL, TypeScript, Elastic Search, Ruby on Rails, Cypress and Apollo.

Nano 3 Labs

CEO & Founder

April 2016 - March 2019 (3 years)

Vancouver, Canada Area

Worked with clients ranging from startups to well-established companies, helping build successful software products.

- * Project management

- * UI/UX Design

- * System Design

- * Recruiting & Training

- * Software Development: Ruby on Rails, Javascript, React.js and Node.js Development

Lighthouse Labs

Teaching Assistant

November 2014 - July 2016 (1 year 9 months)

Helped students combat errors, misunderstandings and frustrating logic errors. All while being energized by their strong spirits and thirst for knowledge.

Functional Imperative

Web/Mobile Application Developer

July 2015 - April 2016 (10 months)

Toronto, Canada Area

Worked on React applications for clients. It was the first time we used React inside of the organization. I worked on shaping our approach to building React apps with the rest of the team based on my previous experience.

Gastown Labs

Web/Mobile Developer

June 2014 - June 2015 (1 year 1 month)

Helped our client with a large E-Commerce application, updating it to the latest version of Ruby on Rails and React.js and providing consulting on metrics tracking and technology related to business processes. Worked new version of CFL pickem app in React.js.

Provided clients with code reviews, estimates, business advice and UI/UX help.

Freelancer

Web Developer

June 2012 - June 2014 (2 years 1 month)

Vancouver, British Columbia, Canada

Worked with various startups in Vancouver like Klue and Vidigami

Idle Labs

Co-Founder / CTO

February 2013 - October 2013 (9 months)

Vancouver, Canada Area

Co-founded Idle a marketplace to help event organizers find better event spaces.

- * Customer development
- * Business development
- * User interface design
- * User testing
- * Web application development using Ruby on Rails on both internal and external products

iQmetrix

Web Developer (Co-op)

May 2011 - December 2011 (8 months)

Winnipeg, Canada Area

Worked on intraiQ an internet product part of the RQ4 suite of products. intraiQ is a dynamic ajax application based on a Service Oriented Architecture written in .Net.

Responsibilities included:

- * Strong focus on improving the Javascript code base. Refactoring code and trying to think of ways to help make the code better structured.
- * Improving user experience.
- * Server-side programming using ASP.net, C#, WCF and SQL Server

* Mentoring co-op students in different aspects of web development

BlackBerry

Software Developer (Co-op)

September 2010 - December 2010 (4 months)

Ottawa, Ontario, Canada

Worked on implementing the Multimedia API (video & sound) for the Java Virtual Machine (JVM) on QNX, specifically the Playbook tablet and future blackberry smart phones. Most of the work was done using C/C++ with the QNX Momentics IDE (eclipse based). The other part was in Java.

Design patterns, diagrams and technical documents were all used to help manage complexity, thus authoring and reading these was also a big part of the day-to-day work.

Ceridian Canada Ltd.

Software Developer (Co-op)

January 2010 - April 2010 (4 months)

Worked on a web-based payroll management application known as PowerPay Web. The application is written in Java with a DB2 backend, where we spent most of our time. Rational Application Development (RAD) was the IDE of choice (eclipse based) providing a good support for J2EE and our WebSphere web sever.

Education

University of Manitoba

BSc, Computer Science Honours (Cooperative Option) with a Minor in Management · (2008 - 2012)

The University of Winnipeg

· (2007 - 2008)
